Julie Gast, PhD, MCHES
Director, MPH in Health Education & Promotion Program
Utah State University
Sent via email

Dear Dr. Gast:

On behalf of the Council on Education for Public Health, I am pleased to advise you that the CEPH Board of Councilors acted at its August 24, 2022 meeting to accredit the Utah State University MPH in Health Education & Promotion for a five-year term.

I have attached a seal that reflects the program's accreditation status. Based on CEPH procedures, the program's initial accreditation date will be recorded as December 16, 2019.

The accreditation term extends until December 31, 2027, pending your continued documentation of compliance through annual reporting and any other reporting required by the Council.

We are enclosing a copy of the Council's final accreditation report. The report is also being transmitted to the chief executive officer of your university as the Council's official report. This differs from the team's report that you received prior to our meeting in the following areas: the Council added language to Criteria C2 (Faculty Resources) and F1 (Stakeholder Input) acknowledging the program's response to the site visit team's report.

I would like to call your attention to the disclosure provisions in our adopted procedures. You are expected to make the official accreditation report available to the public on request 60 days following the accreditation decision. ***You may make the report and final self-study available in full on your website or must clearly indicate on the website how to request a copy of either document.*** See Section 7 of the [Accreditation Procedures](#) for additional information.

You may append a written response whenever you distribute the report. The official report also will be available on request from CEPH after 60 days, but it is our intent to refer all initial requests to you. If you provide this office with a copy of a written response by October 13, 2022, we will be pleased to append it whenever we respond to a request for the report. Please note that this response is optional.

We would also like to remind you that whenever an accredited school or program undergoes a substantive change, it is obligated to provide written notification to CEPH of the intended change. Substantive changes are defined in the procedures manual, but generally include offering a new or discontinuing an existing degree, adding or discontinuing an area of specialization, offering a degree program in a different format or at a distant site and making major revisions to the curricular requirements. Additional information about substantive changes is available on our [website](#).

We appreciated the many courtesies and helpfulness extended to the site visit team.

Sincerely,

A handwritten signature in black ink, appearing to read "A. Kwon", is written over a faint horizontal line.

Harry T. Kwon, PhD, MPH, MCHES
President
