

Solving the Puzzle

Activity: Your goal is to try to determine what image your puzzle makes before putting it together! Each person will remove one piece from the envelop without looking. Take a few minutes for each person to review their image. Pay attention to what you see as well as what connections you can make. Have each person go around and share their notes, observations and questions from their puzzle. Take notes as a group below. Once everyone has gone, decide on a prediction. Then you can put the puzzle together and see if you are right!

We believe the image is....	

Reflection: How might you adapt an activity like this for young students?
