Word Prediction

Activity: In this activity, you will make inferences about an article prior to reading. On the lines below, write any words you think will be in the article based on the article title only. Then read the article. After reading, identify how many words were included in the article by writing tally marks on the second column beside each word.

My Words	Tally for Times They Appeared in the Reading

Reflection: Why did some words appear in the reading and some not? What words were prevalent?
